

## Richard's Fencebrackets Staggering Success!

On sale in over 700 retailers. They had actually sold out in this store – hence bucket almost empty.

Below: the two pics below equate to just one order which was a regular occurrence. I did this from scratch and built up a thriving business.

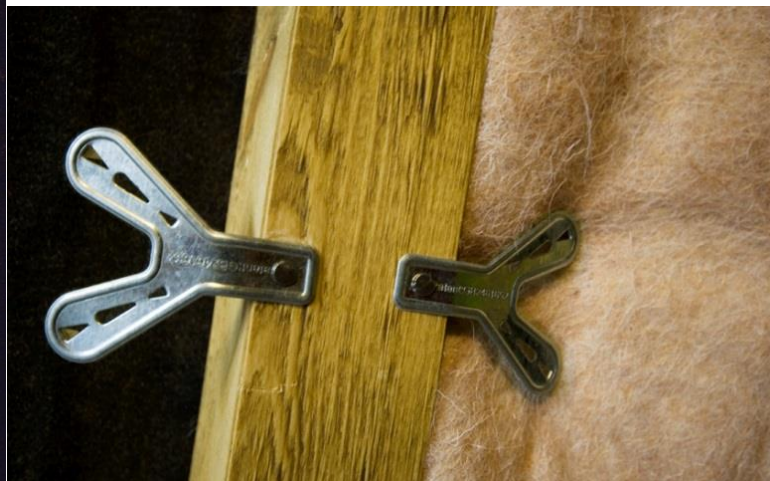

I had designed these stands and had to manufacture them all in my workshop in the freezing winter without any heating trying to get glues to stick. I hated it and looking back on it I loved it. Lol ☺

The Early Launch of the Railman® : has been revamped and improved waiting to get to market”

Rafterclips® - Y clip™. Many versions to follow. I sold 24,000 at trade shows and then never got the chance to go any further even with the other designs because it got destroyed. I had got to market ready stage with two other designs with another 2 or 3 in the queue for different types of insulation.

The above is just a fraction of the achievement. I am currently in North America and the pics are in the UK, but there were my plantladders innovations, products for fishing equipment, my new quick release fence post holders etc. all patented all market ready and destroyed by the crime and jealousy of the Defendants.
